

Join us for the 2nd annual

Arizona

Resuscitation

Academy

Friday, January 24, 2014

9 am - 4 pm

(registration begins at 8:30 am)

Lunch Provided

Hosted at the City of Mesa Public Safety Training Facility

3260 N 40th Street, Mesa AZ 85215

*** Dispatch Track Highlight ***

Helge Myklebust and Tonje Birkenes of Laerdal Corporation will travel from Norway to run a dynamic, hands-on workshop simulating cardiac arrest calls for both new and experienced call-takers and dispatchers. Previous workshops have trained hundreds in Korea, Singapore and Japan. In addition, Katarina Bohm of the Karolinska Institutet in Sweden will present findings that bear on the importance of recognizing agonal breathing over the phone.

3 Tracks to choose from:

- ◆ EMS (CEs provided)
- ◆ Dispatch/Call-Taker
- ◆ Hospital

Hospital Track Highlight

Dr. Benjamin Abella, co-director of the Hypothermia and Resuscitation Training Institute (HART) at Penn, will offer an interactive training in post-resuscitation care. HART is a first-of-its-kind training course targeted at hospital-based resuscitation champions. The course targets physicians (cardiologists, emergency medicine physicians, intensive care physicians), physician assistants, registered and advanced practice nurses, residents, and other health care personnel.

EMS and Dispatch Tracks Highlight

We are excited to have former fire chief Richard Price from the PulsePoint Foundation present the innovative PulsePoint mobile App. The App ties the location of AEDs directly to nearby cardiac arrest incidents through the 911 system and sends real-time AED location information to those within a certain radius of a suspected cardiac arrest.

Seating is Limited

To register and for more information visit:
